

Odour Control

Antimicrobial Protection

Fast Clumping

Non-Toxic

Flushable

Dust-Free

Introduction

Platinum Choice® Antimicrobial Tofu Cat Litter is made of food-grade ingredients. It is one of the best clumping, odour absorbent, hassle free cleaning litters available. It's a natural biodegradable litter that can be flushed down the toilet.

It is an eco-friendly, biodegradable alternative to traditional litters, crafted with non-toxic, antimicrobial components that naturally eliminate **more than 80%** of bacteria and viruses. Its lightweight, dust-free formula forms tight clumps for effortless disposal, while the refreshing natural scent creates a clean, inviting environment for you and your cat.

Key Features

- Antimicrobial Protection
- Easy to Scoop, Fast Clumping
- Flushable, Easy to Dispose
- No Tracking
- Deodorise

Ingredients

Natural Tofu, 100% Plant-based Vikang™ Antimicrobials

ANTIMICROBIAL TOFU CAT LITTER

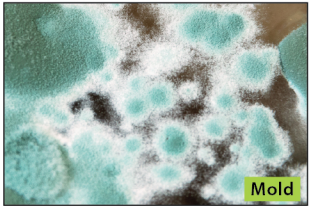

Revolutionary Breakthrough

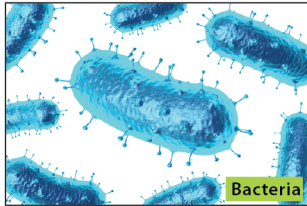

Antimicrobial Cat Litter - Mold Test

- Simple test that can be done to show comparison of Anti-mold capability of Vikang Cat Litter, to prove Reactive Oxygen Species (ROS) is emitted to suppress mold growth.
- Tofu cat litter material itself is a nutrient for bacteria.
- When in contact with moisture and water, bacteria and mold will grow on the cat litter.
- Add equal amount of water (mineral water) to moisten the cat litter daily.
- Observe for mold growth.

Ammonia & Hydrogen Sulfide Testing Results

6.6 kg sample was placed in a 1.5 m³ experimental chamber.

Test pollutants	Ammonia	Hydrogen Sulfide
Time Duration	24 h	24 h
Concentration Value in Control Chamber	2.12 mg/m ³	1.30 mg/m ³
Concentration Value in Sample Test chamber	0.029 mg/m ³	0.022 mg/m ³
Removal Rate	98.63%	98.31%

Directions

1. Fill up your cat litter tray to approximately 7cm in height with Platinum Choice® Antimicrobial Tofu Cat Litter.
2. Regularly remove clumps and solid waste from tray to maintain the freshness of the balance cat litter.
3. Refill your tray with Platinum Choice® Antimicrobial Tofu Cat Litter to approximately 7cm in height.

Fill / Refill to the height of at least 7cm

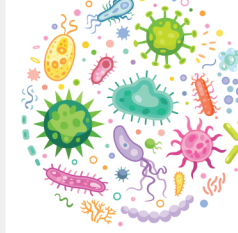

Remove clumps & solid waste

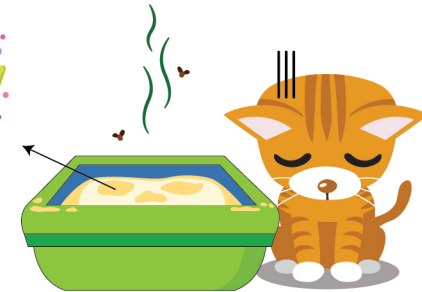

With continuous usage, daily removal of urine clumps and poo, and regular top up, the whole remaining cat litter always maintains Zero Ammonia in all areas.

There is also no urea smell accumulation.

Leaving clumps of pee & poo too long

= home of bacteria & viruses!

Normal Tofu Cat Litter

100% plant-based antimicrobial

With Platinum Choice® Antimicrobial Tofu Cat Litter

Eliminate bacteria and viruses
